- 5.1 Definition of a zone
- 5.2 Zonal statistics
- 5.3 Zonal statistics as table
- 5.4 Zonal geometry
- 5.5 Zonal geometry as table
- 5.6 Zonal histogram

## 5.1 Definition of a zone

A zone is all the cells in a raster that have the same value, regardless of whether or not they are contiguous.

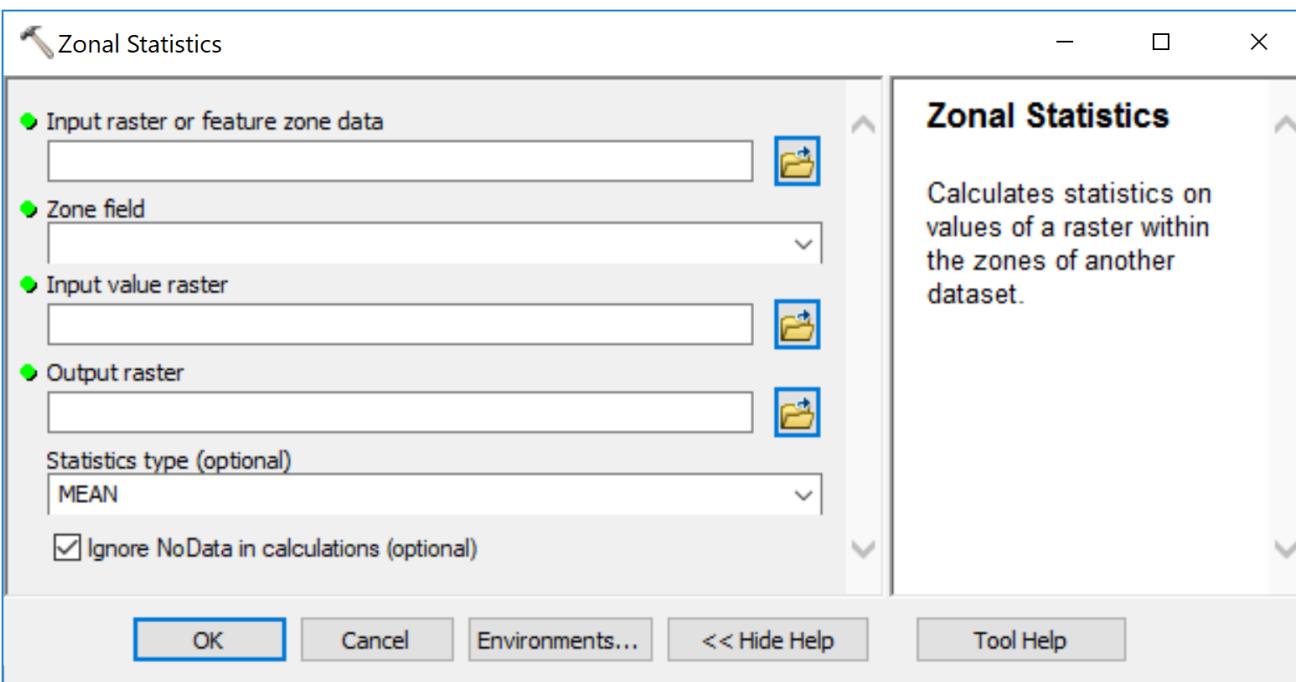

Four zones in a raster

## 5.2 Zonal statistics

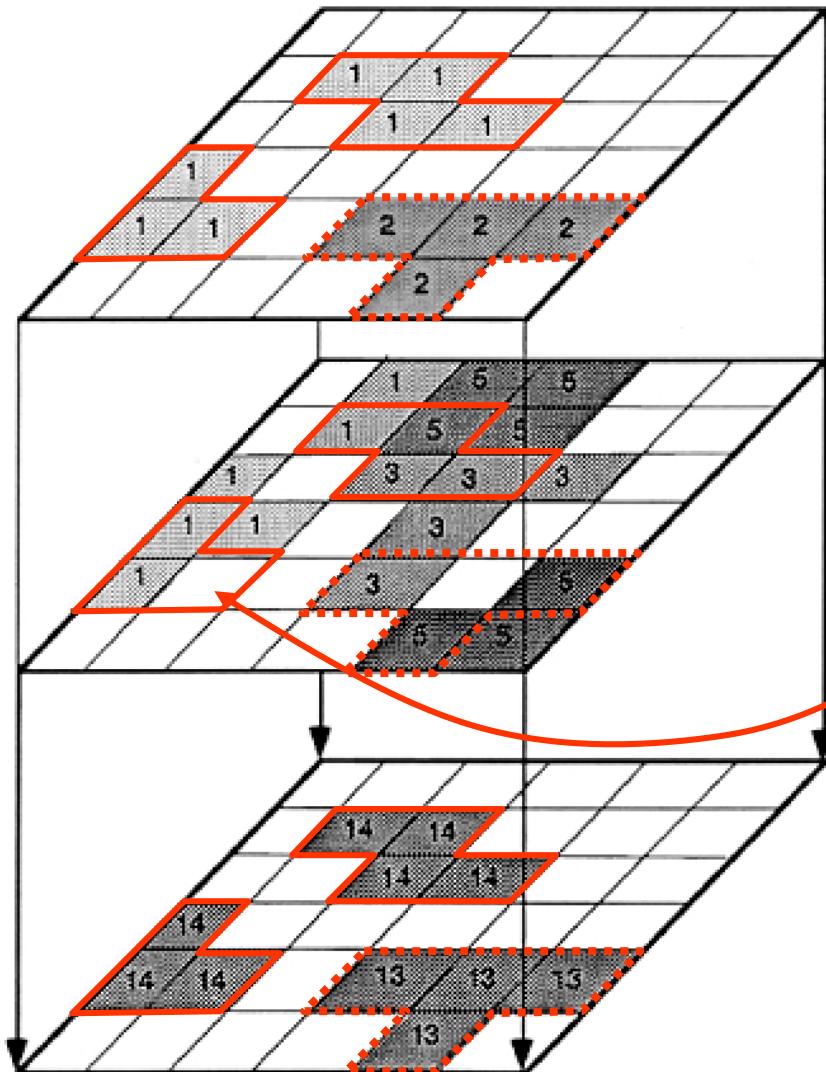

ArcToolbox → Spatial Analyst Tools → Zonal

Zonal statistical functions perform statistics on a per-zone basis; a single output value is computed for every zone in the input zone dataset.

- Majority
- Maximum
- Mean
- Median
- Minimum
- Minority
- Range
- Standard Deviation
- Sum
- Variety
